DAGMA launches exclusively for DESlock in Poland

- DAGMA, Poland sees great potential for sales of DESlock+ under their exclusive distribution agreement as part of the ESET Technology Alliance Program.

Taunton, UK, 20th March 2014 DESlock Limited, the UK leader in data encryption solutions, has entered into an exclusive partnership with DAGMA to sell DESlock+ under an agreement brought about by the newly formed ESET Technology Alliance Program.

“We are very excited to be working with DAGMA who have 25 years experience in security in the Polish market. DAGMA offer a range of specialised security products, including antivirus products and UTM devices, so are well placed to understand the technical advantages of our encryption solutions and relay that to the Polish market” comments David Tomlinson, Managing Director of DESlock Ltd.

DESlock provides a well established encryption product, via a simple-to-use application with unique architecture, to provide powerful data encryption to large enterprises or smaller SMEs. This solution protects against all types of data breaches while allowing fully secure collaboration across complex workgroups and teams. The product integration through the ESET Technology Alliance will provide ESET customers with better protection of company infrastructure as well as effective encryption on employees' mobile devices.

“At DAGMA we focus on delivering new security solutions for the Polish users and reseller network; as such the DESlock product fits very well into our contemporary product portfolio. DESlock+'s wide range of features - from e-mail to full disk encryption - makes it attractive to a variety of customers. The product licensing and price strategy also answer the expectations of our Polish market” comments Pawel Jurek, vice director of business development in DAGMA.

“In Poland, DESlock is being introduced in connection with ESET's Global Alliance Programme. With ESET currently the number one paid AV solution on the market, having DESlock as an up-sale option for our existing ESET customer base gives us really huge possibilities. Putting these advantages together I fully expect DESlock to gain new customers in Poland really fast - either alone or as an additional option for ESET solutions” concluded Jurek.

ESET's Technology Alliance Program aims to better protect businesses with a range of complementary IT security solutions that seamlessly integrate with ESET's range of security solutions.

About DESlock

DESlock Ltd, the UK leader in data encryption solutions, helps organisations and individuals to protect against all types of data breaches by offering a simple, yet extremely powerful set of encryption tools to protect data in transit and at rest. Its flagship product DESlock+ is used by tens of thousands of businesses worldwide to protect copyrighted materials, medical records, government files and other confidential and personal information. DESlock+ software meets the rigorous FIPS-140-2 standard in the US and is validated by the National Institute of Standards and Technology (NIST). DESlock+, has been awarded SC Magazine's Best Buy for three successive years and was also the winner of Computing Security's Encryption Product of the Year in 2012.
